- You can put figures and tables into slides, using the `\includegraphics{}` command and the `tabular` environment, *but*

- you can't use the **figure** and **table** environments; LATEX won't number and caption figures and tables.

- Predefined colors are blue, red, black, █████, cyan, magenta, yellow, green.

  Define colors? Colored formulae? You bet! `\definecolor{darkgreen}{rgb}{0,0.4,0}`

$A = \pi r^2$:

$$\int_0^r 2\pi x \, dx = \pi r^2.$$
